

Sådan påvirker sound field lydmiljøet

- **Et klasseværelse uden sound field**
 - Lydniveauet falder væsentligt over relativ kort afstand
 - Døde zoner betyder, at nogle elever ikke kan høre optimalt
- **Et klasseværelse med sound field**
 - Lydniveauet fra lærerens stemme er jævnt fordelt
 - Alle elever har de rette betingelser for at høre uanset placering

Sound Field around the world

Countries:

- USA 120.000 systems
- Canada 25.000
- UK 15.000
- Australia 8.000
- New Zealand 8.000
- Norway - some
- Denmark - some
- Sweden - few
- Germany - few

Sound Field results: The Facts

Percent of Teachers Taking
Voice-Related Sick Days

**Recess
For Your
Voice**

Why It Works

FrontRow eliminates the vocal strain of having to project to the back of the class. Most teachers using FrontRow report more energy and greater teaching satisfaction.

Student Attention & Behavior
(as reported by teachers & principals)

**0 to 100%
Attention in 5
Seconds**

Why It Works

By making sure the teacher's voice is highly intelligible to all students, FrontRow makes it easier to learn – resulting in improvements in attentiveness, understanding and student behavior.
